Please see posted schedules for complete information concerning rooms, proctors, etc. Schedules may be found in the glass case outside the main office, by the back door of the aud., and on the bulletin board in the lib.

NANCY MACAVOY TO DIRECT

Nancy MacAvoy, theatre and speech major, will soon try her hand at directing.

A very short, one-act play, Nancy plans to present THE LEADER, by Ionesco, possibly during the 11:30 activity period in late Feb. She says "this is an opportunity for those who may be timid, or who may lack self-confidence, to gain valuable experience in a minor production-experience which might expose hidden talent and enable a more confident striving for major productions. She hopes to see many new faces try out.

Please watch the Theatre news bulletin board for dates and times of try-outs.

G. C. C. Drops One 80-72

Greenfield Community College dropped its
first game Saturday night, in a dragging
pperformance against Quinsigamond Community
College 80 -72.

Paul Gigly, advisor-coach, to the team
said that the main factor in the loss
was a two week vacation without a practice.

Greenfield was noticably "slowed up" in
the game, as spirit seemed to be lacking g
greatly. The Barons stayed within winning
distance throughout the gameuntil last
minute fouls put them out of the reach
mf victory.

A well supported team that night, the
Barons left the court glumly, and now are
awaiting their bout with Springfield
Technical Community College, Thursday.
Greenfield defeated Springfield in early
December.

Riddles You Should Know

Q. Why does room 105 have a climate like
Africa, while the snack bar, directly
below it, has a climate like Antartica?

A.

A. Because Mrs. Gigley is a Mau Mau in
disguise, and the ice cream machine
has been taken over by Communist, who
are using the freezing unit to create
a Siberian Atmosphere.

Q. Why was the Circle K dance called to a
halt one half hour before the time
advertised?

A. Because, in an environment so pschedelic,
several members of the organization went

2.

wild, eating flowers whereypon the
police department stepped in,calling
the entire deflowering obcene.

Q. Why were street sales of Mother of Voices
halted in Greenfield?

A. Because the town Mothers, under the dir-
ection of Dorethea Victoria Pratt III
decided that a Foldout pinup of
Martha Washington should not be
viewed until legally recognizes the
fact that George is out of office.

Q. Why isn't there a chapter of the Sexual
Freedom League in Greenfield?

A. Because under the Greenfield Constitution
Chapter 77, Sex is illegal.

Q. Why was it so cold at the film the
Collector?

A. Because, the committee in charge had deci-
ded to boost attendance by permanantly
Freezing patrons to their seats.

The students for sex law reform are look-
ing for interested people here in Greenfield.

THE NEW COMMUNITY COLLEGE

by L.C.Spungin

The long-range development plan and master plan for the new Greenfield Community College, which rests in the files of Pres. Lewis O. Turner, is a symbol of hope for administration, faculty, and students.

By 1970, the College hopes to move into Phase I of a ten-million dollar complex which will serve a 1,500 student enrollment.

Phase I which has a 1968 timetable, is currently snagged by the need for \$250,000 to be combined with an earlier appropriation of \$200,000 to take care of the architect's plan for a much larger facility than was originally planned. Already, the State Bureau of Building Construction has approved the college's master plan for a school with a 4,000 enrollment. The difficulty is that other colleges are also competing for funds, and the money will be limited.

Who would have thought that this tiny college sitting sedately on "Federal St. 500 yds. north of the Common on Main St.", as it is described in the master plan, would be the nucleus of a project in the category of "big business"? No one can deny that a \$ten million complex is truly "big business".

Enrollment has spiralled from 125 students in 1963, when the college opened, to 631 last fall; enrollment of 725 is expected for next fall, even though it will crowd an already tight building.

For lack of a gymnasium, the basketball team has to play off campus. For lack of a suitable auditorium, concerts and plays are being presented at Greenfield High School. There is no suitable study area except the library which, it is generally agreed, is overcrowded, hot and stuffy. Even the lack of full-time service in the cafeteria is frustrating to faculty and students. And, no one has come up with a solution to the parking problem.

Here is the school picture as it exists today: there are seven general purpose classrooms and six special purpose ones, including three rooms for nursing, arts and engineering technology in the rented Corsiglia building.

Thirty-two faculty and administration spaces are distributed throughout the building. The library is housed on the second floor. In the basement are the snack bar, the cafeteria, and the bookstore. The facilities on the third floor include laboratories as follows: geology, biology,

chemistry, physics and natural sciences.

Parking facilities include those on the college grounds, the rented Corsiglia area and the GTD parking lot.

Classrooms space total 10,751 square feet; total indoor space is 36,370 sq. ft.

For comparison, Phase I of the planned 1,500 student facility will have 56 classrooms; as follows: one lecture hall; 12 general purpose classrooms; 24 special areas for 20-25 students each; and 10 small special purpose rooms.

Eighty-six spaces are reserved for faculty offices, as well as administration and student personnel offices. Rooms for special services will serve for counseling reading, speech and hearing.

Total space in this facility, including maintenance and storage, will be 225,000 sq. ft.

The acreage, as pictured on the master plan wall maps in the college conference room, is as follows: roads and parking-29 acres; physical education fields-19; required open space-15; physical plant-26; surplus-38; land not recommended for building 25; for a total of 152 acres.

The first step, Phase I, will cost about \$5million. As planned, this step would leave the auditorium and food areas for Phase L-b which will cost about the same, including equipment.

Pres. Turner, at a recent meeting with legislators, explained the many unusual features of the preliminary design, including a series of structures that are compressed into one area at levels. With this design, students will be able to pass between areas without going outdoors.

Money will be sought during the fiscal 1969 budget, to start construction on Phase I. Because more land will be required to fulfill the hopes contained in the long range development plan and the master building plan, it was also agreed to try to convince officials of this need.

FACULTY SINKS ALUMNI 100-99

The faculty showed that its power is not merely intellectual, Dec. 29, at the Turners Falls High School. The game, of course, was basketball, and the faculty, they would have us believe, performed tremendously.

Actually the faculty, sporting miles of bandaged knees, was excellent. It was also supported by a few ringers, as it edged the alumni 100-99 in a game that went into double overtime, as well hysterics.

Mr. DelGuidice, Mr. Viamonte, Mr. Hench Mr Gigley, and Mr. Kier (along with name stars as Charlie Toohey, Buzz Gagne, Bob Elauch, Mark Coffey, and Steve Schaff) were splendid.

Coach Gigly seemed proud of his team's efforts, over a dejected Coach Padquq's team.

All who attended enjoyed the hard fought battle, in which injuries such as rheumatism and artheritis seemed to take their toll.

Courses for next semester con't.

Marc-ist Theory--Chief John Murphy
Elm St. Annex--Tues. & Thurs. for 20 yrs.

Consumer Merchandizing--Risky Case

WORD HAS IT THAT.....
CONGRATULATIONS ARE IN STORE FOR ANGELA RANDALL AND PAUL FEELY - good luck kids....
Jeri Case's Sego diet is so effective that our own illustrious Mrs. Case is trying to "rationalize" her way into the program.... Audrey Bullards' been seeing a lot of George Sibley-- ask her about the Christmas card.... the GIGLEY'S were given the "hint" about grandchildren etc. on their recent visit to the City of Oz.... Mr. Prescott has about had it with the wiring in '65 Chev's.... Margo Vidrine will remember to shut off her parking lights next time.... Phil May's girl Nancy is going into the sweater making business, yours is a fine example of her handi-work Phil.... Fred Talbot learned what the old expression "eating like pigs" means on a recent trip to a relatives farm-- been in the cafeteria lately, after the three minute call, Ferd?... Carolyn Tracey is taking a course in make-up---ignore her use of eye shadow for the next few daze.... Dolores Griel is conducting a demonstration on the art of properly mixing the "CIDER WHIZZIE" - some kick (ask Norman Tworig)....

That's all for now, see you later,
 FRIEDA GOSSIP
